Because the product contains QAC sanitiser, do not use as a Clean-In-Place (CIP) cleaner for enclosed systems, because pooling in such systems may lead to contamination by detergent residues. This product may be used for cleaning large processing rooms provided the room can be divided into distinct areas, no edible product or packaging material is present in the area during cleaning and there can be no possibility of contamination of product or packaging material as a result of cleaning. After using this compound, food contact surfaces must be thoroughly rinsed with potable water before production starts.

DANGER
