## Cleaning Chemical Safety & Awareness

Pete,  
professional  
cleaner

Hey there! If you're anything like me, you like to do your job well, so you can get home to your friends and family safe and healthy. Right?

Great! In that case I'm happy to introduce you to the **Kemsol Safety & Awareness eLearning Course** or **SAe for short!**

SAe Inspector

### What is SAe all about?

Well, it can help us learn about:

- Handling cleaning chemicals
- Understanding cleaning product labels
- Using personal protective equipment when using cleaning chemicals
- Understanding the legal aspects of cleaning
- Identifying and handling workplace hazards
- Assisting a person in a first aid emergency

### Who is it for?

Cleaners, distributors, their customers and staff, those who sell hygiene products and anyone that just wants to be cleaning in a safer way.

### The small print

The course won't stop all accident and mistakes – but it will help to reduce the number of workplace incidents.

It's not formally recognised to help achieve any specific NZ training or formal qualification or unit standard.

Doesn't change obligations of H&S at Work Act 2015 (HSWA).

No products or services are promoted, nor does it aim to gain or share personal or business information.
